

⚠ Precautions for Use

- **BRUSS** is for upward applications only. If it is used for downward and sideward applications, the product may be damaged or the ball may malfunction.
- **BRUSN-N** and **BRUSP-P** can be used in upward, downward, and sideward applications.

- Set screw type ball rollers for upward applications.
- We offer a full lineup of this type of ball roller. You can select from the following main body and main ball combinations: stainless steel, polyacetal, and PEEK.
- **BRUSS** has a small coefficient of friction and can move workpiece with less force. ➡ P.xxxx
- **BRUSP-P** is intended for applications that require cleanliness, heat resistance, or chemical resistance, such as FPD production equipment and semiconductor devices.
- **BRUSN-N** and **BRUSP-P** have drain holes and are intended for food production lines and other applications that require cleaning.
