- Seal washer incorporating rubber packing in a stainless steel washer.
- Prevents air/liquid leakage from the seating surface of the screw head. Test results for JIS C 0920 protection degree IPX7 are available on the NBK website.
- During screw tightening, the rubber bonds with the screw thread to make the seal rather than slipping out of place.
- Four types of material are used in the rubber packing. They can be selected by the end symbol of the part number.

Part Number	Rubber Packing Material	Characteristics	Heat Resistance Temperature
SWS	NBR	Standard	80°C
SWS-F	Fluoro-rubber	Chemical-proof/heat-resistance/ozone resistance	200°C
SWS-E	EPDM	Weather resistance/water resistance/ozone resistance	120°C
SWS-S	Silicone rubber	Heat-resistance/cold-resistance/electrical insulation	180°C
