SNSL Hex Socket Head Cap Screws (SUS316L)

- These screws have corrosion resistibility against chemical products and seawater environments that matches or exceeds SUS304.
- Nonmagnetic.
- SUS316L is a stainless steel made by adding Mo to SUS304, so it has high pitting corrosion and oxidation resistance. Due to its reduced carbon, it also has high intergranular corrosion resistibility.
- High strength even under high temperatures because of basic components include Mo.
- **SNSL-UCL** with cleanroom washing/cleanroom packing provided are available for some sizes.
- Application

FPD production equipment, semiconductor devices, aquatic applications, and general industrial machines
